Contents Volume 110 (1998)

Volume 110, No. 1, January (I) 1998

B. Enriquez, B. Feigin and V. Rubtsov: Separation of variables for Gaudin-Galogero systems 1–16
Renata Scognamillo: An elementary approach to the abelianization of the Hitchin system for arbitrary reductive groups 17–37
Emmanuel Lesigne: Loi des grands nombres pour des sommes de Riesz-Raikov multidimensionnelles 39–49
Hans-Joachim Baues: The degree of maps between certain 6-manifolds 51–64
E. Getzler and M.M. Kapranov: Modular operads 65–126

Volume 110, No. 2, January (II) 1998

Eric M. Friedlander: Algebraic cocycles on normal, quasi-projective varieties 127–162
Alexandre I. Kabanov: The second cohomology with symplectic coefficients of the moduli space of smooth projective curves 163–186
Emmanuelle Frossard: Groupe de Chow de dimension zéro des fibrations en variétés de Severi-Brauer 187–213
Frédéric Mangolte and Joost van Hamel: Algebraic cycles and topology of real Enriques surfaces 215–238
Michel Balazard et Gérald Tenenbaum: Sur la répartition des valeurs de la fonction d'Euler 239–250

Volume 110, No. 3, February 1998

Phillip Griffith: A relative filtration index and fibers of normal primes in extensions of finite type 251–262
Tomohiro Okuma: The second pluri-genus of surface singularities 263–276
D. Barlet and H.-M. Maire: Décroissance rapide de la distribution f^{λ} 277–290
T.J. Jarvis: Torsion-free sheaves and moduli of generalized spin curves 291–333
J. Gebel, A. Pethö and H.G. Zimmer: On Mordell's equation 335–367
